

2. Write a program that takes day and month from the command line and prints true if

day of month is between March 20 and June 20, false otherwise.

```
GNU nano 4.8                                marJune.sh
#!/bin/bash -x
read -p "enter no for month" month;
#MONTHS[] = {31, 28, 31, 30, 31, 30, 31, 31, 30, 31, 30, 31}
if [[ $month -eq 1 || $month -eq 3 || $month -eq 5 || $month -eq 7 || $month -eq 8 || $month -eq
10 || $month -eq 12 ]]
then
    read -p "enter a day of month max 31" day;
elif [[ $month -eq 4 || $month -eq 6 || $month -eq 9 || $month -eq 11 ]]
then
    read -p "enter a day of month max 30" day;
else
    read -p "enter a day of the month 28" day;
fi
if [[ $month -gt 2 && $month -lt 7 ]]
then
    if [ $month -eq 3 ]
    then
        if [ $day -gt 19 ]
        then
            echo true
        else
            echo false
        fi
    fi
    if [ $month -eq 6 ]
    then
        if [ $day -lt 21 ]
        then
            echo true
        else
            echo false
        fi
    fi
else
    echo false
fi
```
